# IREB PRACTITIONER LEVEL COURSE

# ADVANCED CERTIFICATION EXAM

KCS EDUCATION

## Level up Journey in Requirements Management with IREB Practitioner Level training course

The main objective of this training session is to build upon the knowledge gained in the Foundation level, exploring advanced topics in Requirements Management. Participants will focus on managing requirement changes, conflict resolution, and using advanced elicitation and modeling tools. These are critical skills for effectively managing requirements in complex systems and projects.

This course aims to equip participants with the necessary skills and knowledge to pass the official IREB Practitioner Certification exam. The training combines theoretical content with practical exercises and case studies, ensuring students gain a comprehensive understanding of advanced requirements management practices. Interaction among participants is encouraged, and practice exams are included to simulate the real certification exam experience.

This course is presented online via MS Teams, in English. Proficiency in English is required.

## THE TRAINER

[lars.anderberg@reusecompany.com](mailto:lars.anderberg@reusecompany.com)

**LARS ANDERBERG**

**MSC, ESEP APPLICATION CONSULTANT**

Lars Anderberg is a seasoned professional with over 20 years of experience in Systems Engineering. As an INCOSE certified Expert Systems Engineering Professional, Lars excels in combining Systems Engineering practices and Requirements Management with public procurement processes.

As a Principal Consultant, Lars has been coaching over 50 Development Projects in a wide range of organisations with tailoring a Requirements Management Capability for the organisation.

Lars has a lead role in developing the new capability "Acquisition Studio" within The REUSE company's SES Tool suite, enhancing the tool's effectiveness in Requirements Management in Acquisition contexts. He is adept at developing tools for Requirements Management, ensuring efficient and effective project outcomes. Additionally, Lars has long experience of education, developing and delivering comprehensive training programs in Requirements Engineering and the use of specialised tools.

### \*\*DISCLAIMER\*\*

Our student groups tend to be small. In contrast to many remote and self-paced courses, we offer a personalized service to guide and support our students throughout the entire studying period. Participating, making questions, and collaboration between students & professor is highly encouraged and achieved.
